ROLEMASTER RPG

A new version of Rolemaster will be coming out later this year, so we have to clear our current stocks. But at these ridiculous prices our stocks won't last long. Rolemaster RPG is a complete boxed fantasy role playing system, and contains three core books. This state of the art system adds realism and depth to your campaign without sacrificing playability. For one, how many RPGs are out there that would require your player characters to run away from some of the monsters they meet! The first book in the box is *Arms Law and Claw Law*, the armed and unarmed combat system, which can be adapted to any other fantasy role playing game. Each weapon has its own unique attack and critical hit tables. 30 individual weapon attack charts are included, 10 critical strike tables, 12 animal & martial art charts, & heaps of options. 96 pages.

The second book is *Spell Law*, which is Rolemaster's sourcebook for over 2000 fantasy spells, based on 3 realms of power and 15 character professions. Again adaptable for any fantasy role playing game, its magic system includes individual spell attack tables, critical strike tables, a power point system, workable alchemy rules, etc. 160 pages.

The third book is *Character and Campaign Law*, which is Rolemaster's complete character development rules set which uses a combined skill and level system. This enables players to create truly remarkable and individual fantasy characters. Also includes extensive campaign and gamesmaster guidelines. 144 pages.

THE BATTLETECH COMPENDIUM

FASA are re-doing the BattleTech Compendium, which is why we are clearing this one out. But they are not revising the game rules. They are merely updating them to include the rules found in Battlespace and I think, the rules from the new BattleTech Tactical Handbook. So although this version of the Compendium will be out of date, the rules will still be correct.

This 144 page book is a must have for all BattleTech players, containing all the rules needed to play BattleTech. Comprehensive rules cover all the advanced weapons types, Clan Battlearmor, omnimechs, pulse lasers, shotgun rounds, streak SRMs, CASE, XL engines, etc. There are two full color sections of 8 pages each, detailing Clan mech and battlearmor paint schemes, and a miniatures conversion from Ral Partha which allows you to play without hexes. Also includes construction costs and rules on all mech, AFV, aerospace, and infantry types and components. Record sheets are included for all vehicle types, and there are many optional rules included as well.

MAGIC: THE GATHERING

Magic: The Gathering is still the hottest game and set of collectable trading cards all around the world. It is published by **Wizards of the Coast**, and is the first product in the **Deckmaster System**. To play, two players shuffle and cut each others decks, the top card of the cut becomes that player's *Ante*. Seven cards are dealt, the remainder form the *Library*, from which cards are drawn - discards go into the *Graveyard*. Each player has 20 Life Points (we recommend *Life Point Stones* from **The Armory**, see page 14), and the winner is the first to reduce his opponent to 0. The loser forfeits the *Ante*. The rationale of the game is that you and your opponent are mighty sorcerers and are fighting a duel in another dimension. In the beginning nothing exists in the dimension, and everything must be drawn into it by a *Spell* card. Spells are cast using *Mana*, which comes from *land* cards. Creatures are also called forth to do battle against the opponent.

WIZ **Magic: Revised Starter Deck** **\$15.50**
The original Collectable Trading Card Game. Comes with a random assortment of 60 cards from a total of over 360. It contains at least 2 rare and 2 uncommon cards. Each person needs at least 2 decks to play. To have a good crack at buying a large proportion of the set, buy a whole display, which gives you a total of 600 cards (with lots of double ups, of course)... **\$140.00**

WIZ **Magic: Revised Booster Pack** **\$5.00**
A random assortment of 15 cards, with at least one rare and one uncommon card. Some packs may also contain cards from *Antiquities* or *Arabian Nights*. To get almost the entire set of cards, buy a whole display of 36 packs, 540 cards... **\$162.00**

WIZ **Magic: The Dark Booster Pack (Due early August)** **\$3.20**
It lurks in the fetid swamps and beneath the roots of ancient trees. It hides in goblin caves and beneath the Inquisitor's hood, and swims through the empty halls of sunken cities. From the depths of *Dominia* (the world of *Magic the Gathering*) comes a new addition to the game - with more than 100 new cards for use with your deck. Don't be afraid of the darkness, but of what hides in...the Dark! Each booster pack contains a random assortment of 8 cards. That means that a display of 60 packs should have around 4 - 5 complete sets of the Dark cards. If you still want the display... **\$172.00**

WIZ **Magic: Pocket Players Guide** **\$16.00**
A paperback book that contains updated rules for *Magic The Gathering*, along with examples to illustrate play and conversion notes for players used to the original *Magic* rules. Provides tips on how to maximize your game skills using deck-building strategies. Also answers to your *Magic* questions, rules for league play, tournament play, and multi-player games. Also a complete card list.

WIZ **Magic: Fallen Empires Booster Pack (Due Nov)** **\$3.20**
In the southern oceans of *Dominia Prime* lay a continent of great kingdoms. Far from the war between *Urza* and *Mishra*, the lands of *Sarpadia* prospered. But as the climate changed, resources dwindled and empires crumbled. Hideous new species arose in the forests and seas, forcing the *Sarpadians* to fight for their very survival; *loatian* towns mustered *Phalanxes* to defend themselves from *orc* raiders and the misbegotten spawn of uncontrolled black magic. Recruit these toughened warriors and vicious predators into your duels...Each booster pack contains 8 cards, chosen randomly from an assortment of around 100 new cards. That means a display of 60 packs should have around 4 - 5 complete sets of the *Fallen Empire* cards. If you still want the display... **\$172.00**

JYHAD

The second game in the *Deckmaster* system, but *Wizards of the Coast*, set this time in the world of *Vampire* by *White Wolf*. It retains the gothic punk feel of the game, emphasizes combat and politics. Blood is a key element, for the vampire a player represents as well as for servant vampires. Most vampires are a member of one of the seven vampire clans. Players fight against other vampires for control of vampires, strategic locations like radio stations, police stations, and titles such as *Prince of Chicago*. Please note that we have only limited numbers coming of these two items, so get your order in really quickly!

- 1. Decision at Thunder Rift** 1st Battletech novel. Grayson Carlyle finds his life destroyed when bandits attack his world and massacre the garrison. Now all he needs to begin his revenge is a mech - but how?
 - 2. Mercenary Star** The sequel to Decision at Thunder Rift. The new mercenaries receive their first assignment, training former rebels on Verthandi. But getting the factions of scattered farmers together won't be easy, and the Legion's toughest battles wait for them... A good novel.
 - 3. Wolf Pack** - a superb novel set in 3053, not long after Tukayyid. Jamie Wolf is aging and needs to consider a successor, but factions within the Wolf's Dragons have other plans, and so begins a civil war that could destroy the Dragons for ever...
 - 4. Natural Selection** - a new bandit unit using Clan weaponry has invaded Federated Commonwealth space & is stomping on every garrison that gets in the way. Both the Wolf Clan and FC are desperate to stop these bandits before it escalates into a war - but who is supplying them?
 - 5. Ideal War** - Thomas Marik has conceived of a plan to elevate the position of mechwarriors and keep devastating technological weapons on the back burner - but his plan is threatened by a vicious war on Gibson.

With an elaborate plan, they assault Glangary, when most of the Gray Death Legion are called away. What chance do the recruits & others left behind have against overwhelming odds? Can young Alexander Carlyle perform a miracle?
 - 8. Assumption of Risk** By Michael Stackpole. Arguably the best Battletech novel written to date - this novel will set your mind spinning. As Kai Allard-Liao fences with his uncle Tormano Liao, we not only discover the horrifying truth behind Katrina Steiner's murder, but events almost lead to war, and the machinations of Devlon/Steinor politics are gripping.
 - 9. The Far Country** A Kurita jumpship makes a misjump and arrives near an uncharted planet. The ship falling apart, the 8 Kurita strike team members, mech mercs, and ship's crew all flee to the planet, where they find another ship has made a similar misjump 300 years ago. They spend most of the novel fighting amongst themselves, & then against the earlier people. The heroes of the book are bird-aliens who behave like Ewoks.
 - 10. D.R.T. Part two in following Jeremiah Rose & his Black Thorns.** They land a job defending the Kuritan planet Wolcott inside Smoke Jaguar territory. The fact that they are paid so much of their contract in advance makes the whole affair appear somewhat suspicious, and they end up going head to head with the Nova Cats, both First & Second Line units.
 - 11. Close Quarters** The Cabelleros sign on to protect Theodore Kuritas corporate-mogul cousin, they think it's a low risk, high paid job. But danger lurks among the looming

Having trouble trying to carry your miniatures around without them bouncing around? Well, here's the best answer possible. Each sheet of MagTags has 100 sticky, flat magnets, which you can peel off and stick underneath your miniatures, whether an element of figures used in DMB and the like, or a single fantasy or sci-fi figure. If the 4cm x 2cm size is not what you need, it cuts easily with a Stanley knife or even a razor blade. Then buy yourself a metal tool box and just place the figures mounted on MagTags in the box, and they stick! A figure like a Citadel mounted figure may require one and a half magnets. **\$8.00**

AH REPUBLIC OF ROME

An enjoyable, deceptively engrossing card 'n' counter game for 3 to 5 history buffs (a touch of megalomania helps!), each representing a faction of influential Senators vying for the Consulship of Rome. Players ruthlessly compete for peer influence & plebeian popularity, using means both fair & foul to achieve prominence. These unscrupulous cliques must also cooperate somewhat to ensure that Rome doesn't succumb to military conquest, or to restless mobs; but with 250 years of Roman Republic history to play with, that's not going to be easy! Great fun, and educational too, however I pity the poor sod who has to read the rulebook first! \$85.00

COM SHOGUN TRIUMPHANT

For years I've been trying to find out what actually happened at the Battle of Sekigahara, where Lord Tokugawa unified Japan under his rule. The movie Shogun stopped just before the battle, and the five novels on Mushashi started just after the battle. At last - someone reports the battle preparation, the belligerents present in each army, how they deployed for battle, and what actually happened in the battle. The game includes 160 counters plus a map, and faithfully recreates this epic battle, in which Tokugawa successfully out-thought his opponents. \$18.00

A classic boardgame of abstract grand strategy, where 2 to 7 imperialistic nations try to carve out niches for themselves in pre-WWI Europe. The game's dice-free mechanics are simplistic in design, allowing players to immerse themselves in the machiavellian politics of empire building. Military successes will still win the day, but only if built upon prudent diplomatic machinations. 3W LAWRENCE OF ARABIA

The Year is 1918, and for the Turkish command in Palestine, things look bleak. Morale is poor, their supply and command have potentially disastrous problems, they have practically no airforce, they have no reserves, & their forces are spread thin. However, the game has been designed in such a way to make playing the Turkish side just as much a challenge as playing the Allies. It gives the British a dilemma in taking Damascus, in that if the Arabs take it, they lose 20 tactical points, although it is their strategic goal. The British have a very tight schedule & must foray for water and food for his horses, & there is a small but powerful German unit present. The game has very high solitaire suitability, 240 counters, a 34"x22" map, scenarios, & campaign. **\$35.00**

COM CZECHOSLOVAKIA 1938

A what-if game for two players of what might have been the first campaign of World War II in Europe, if the Prague Government rejected the Munich Dictat. The Czechs were in a hopeless position, with their nation projecting into Germany like a long sausage. The Germans could have attacked from both sides and cut them to pieces with blitzkrieg. But the Germans would have had problems too. Their blitzkrieg was untested, the Luftwaffe required good weather, the Russians had promised to send 600 aircraft to help the Czechs, and there were many maginot style defenses. All of this is covered in the game. With 142 counters & a 34"x22" map. **\$18.00**

GMT OPERATION MERCURY

In the Spring of 1941 the German blitzkrieg crushed the Balkans, and rapidly overran Yugoslavia and Greece. The Allied forces retreated to Crete, and Hitler was pressured to take the island a.s.a.p. so that the Allies could not keep airbases there, as it was May and the invasion of Russia was set for June. So he sent in his crack Paratroop units and a Mountain Division, and though they took Crete, the airborne troops suffered so badly he never used them in a major operation again. Includes 400 counters, including Australia and New Zealand, 22x34 mapboards, dice, etc. **\$60.00**

This game of Guderian's drive on Moscow, from Sep 21 to Dec 20, 1941, has been given rave reviews, and at the insistence of Bradley Ellis (the previous Mil Sims artist) we have got some in. This is the first in the new Operational Combat Series games, OCS, which are an in-depth series requiring the utmost use of operational resources of units, supply, and transportation. Both players find themselves confronting operational puzzles of the highest magnitude as they attempt to apply their limited resources. There are tons of supply counters, transport counters, and each unit counter is given a combat facing and a movement facing on the back. As such this is an extremely realistic game. It also features tactical surprise effects, special units, realistic blitzkriegs, 1260 superb counters (ask Brad) which include aircraft, 6 teaching scenarios, 8 major scenarios, and many play aids. Features a new easy to learn and use game system, with rules that are simple. Soviet play requires the optimum use of a ponderous and fragile weapon - the Red Army of '42. German play requires sabre-like use of mobile reserves, and lightning hit and run attacks designed to derail the Soviet military machine. Contains 22" x 34" map, 420 full color counters, 3 scenarios. For two or more players, turns are 2 days, hexes are 10 km. Units are regiments & divisions. **\$50.00**

AH TURNING POINT: STALINGRAD

Recreates the brutal fighting in & around the city of Stalingrad, from Sept. 4 1942 to Nov. 14. Turns are broken into variable day/night impulses which play fast & constantly change advantages to both sides. The unique combat system & semi-simultaneous movement covers the gamut of urban combat - overruns, sudden break-thrus, encirclements, tenacious defence & week-long stalemates. Additional details like rubble, artillery barrages, fortifications, & air support add zest to a highly playable and closely-fought game. Features a lavish 16"x44" mapboard (area movement) & 394 counters (battalion level). **\$50.00**

FGA WAR FOR THE MOTHERLAND

PACIFIC THEATRE

AH GUADALCANAL

The first real check to Japanese expansion, the Battle of the Coral Sea in May 1942, and the first Allied offensive in the Pacific, the Battle of Guadalcanal, November 1942, all took part where this game is set - the Solomon Islands. Midway paved the way for this Allied offensive, when in August the US took an air-strip on Guadalcanal from the Japanese, converting it into their own. This game features three mounted mapboards (two search & one battle), six scenarios, excellent visual aids such as Operations Cards, 356 counters, & easy to learn rules. Thoroughly recommended. **\$70.00**

AH MIDWAY 2nd Edition

After the daring Doolittle bomber raid on Tokyo the Japanese decided to capture the airfield on Midway, and hopefully lure the US navy to its doom. But those deceitful orientals weren't going to fool old Nimitz, with a little help from cryptologists the trap was revealed, and a counter-ambush prepared. This is a tense simulation where players maneuver their fleets and conduct air patrols on a personal searchboard. When one side makes contact with an enemy vessel(s) the combatants are transferred to a battleboard where plans and ships slug it out. Very tense stuff indeed! Components include 226 counters (individual capital ships & squadrons of aircraft), a 22"x14" battleboard plus two 14"x11" searchboards (70 miles per hex). Features easy to learn rules, and an illustrated historic battle manual. **\$45.00**

VIC PACIFIC WAR

In 1941 Japanese investment in foreign real estate was causing a hell of a lot more anxious teeth-grashing than it is now! This is a big game with fully integrated air, land & naval operations. Turns are monthly, but include daily movement. Contains 20 scenarios, 2340 counters (individual capital ships, air groups, divisions & battalions) & two 22"x32" maps (100 miles/hex). Mechanics include limited intelligence, sub-marine combat, bombardment, airfield repair, weather, strategic bombing, merchant shipping attrition, strategic transport, naval repairs, engineering, demolitions, etc. With astute planning & careful management the Emperor may indeed sip his green tea by Sydney Harbor! **\$100.00**

3W "SCRATCH ONE FLAT TOP!"

A simulation of the battle for the Coral Sea, the first naval engagement that relied on search-planes for target acquisition, & dive-bombers for firepower - the opposing ships never physically saw each other. Mechanics include fuel limitations, weather fronts, critical decisions on search patterns, land-based air, submarines, shore bombardments, and more. Contains 10 scenarios, 200 counters, and 2 movement/search maps. This game is normally \$50.00. **\$33.00**

AH VICTORY IN THE PACIFIC 2nd Edition

Ideal for beginners or for those who want a quick-playing campaign with generous lashings of dice tossing, & where slugging a cold brew or two (or more) won't be detrimental! This very entertaining game starts with the Pearl Harbor raid in 1941, when the Japanese fleet was irrepressible, & ends in 1945 by which time Allied naval strength had burgeoned dramatically. Play revolves around the capture of ports and airbases, accumulating points of control, and blowing the steamers' faeces out of everything afloat! Components include 169 large counters (individual battleships, carriers & cruisers), lots o' markers, and a 22"x28" mapboard (area movement). Recommended. **\$55.00**

Two to six despots, driven by avarice and a lust for power, seek to dominate the world! Conquest is achieved, albeit slowly, through a blend of shrewd economic proliferation, machiavellian diplomacy, and ruthless military strategies. Each nation must compete ruthlessly with its neighbours to expand its financial base - procuring natural resources and trading for profit on the world market. Huge sums of money are thus accumulated, and what else can you spend it on besides military hardware? The answer's nothing - so armies, navies & nuclear warheads suddenly proliferate. These tools of destruction are generally waved at an opponent in a threatening manner, until they in turn purchase some for similar coercive displays. What happens when two to six megalomaniacs fool around with nuclear weapons? Usually Armageddon! End of game. **\$99.00**

SCIENCE FICTION

FAS BATTLETECH 3rd Edition

By the 28th Century, mankind had spread civilization to hundreds of worlds, spanning hundreds of lightyears out from Earth. But then began the Succession Wars, horrible conflicts which destroyed technology and human life without precedent. By 3025 AD, war had reduced very much to attrition - great 10 meter tall war machines called BattleMechs ruled the battlefields, but once destroyed, were not easily replaced. Hence the Mechs on the field were mostly decades old, patched up time and time again, just to keep them in the field. The few factories not destroyed in the Wars turn out a pitifully small number of new mechs.

Enter the world of BATTLETECH, where men & women piloting these great machines fight desperate battles over these few production facilities, neighboring space, and limited water reserves. The Mechs are true titans, unequalled by any prior technology, each bristling with enough weapons to destroy a modern day tank battalion, soaking up their punishment with sophisticated ferro-fibrous armor and titanium frames. This 3rd edition comes with a 56 page rulebook (updated to the BATTLETECH COMPENDIUM) that covers heat build-up, piloting skills, critical hits, physical attacks (punching, etc), movement, combat, etc. It also has 4 scenarios, details on the Successor

States, Mercenary Companies, Bandit Kings, MechWarrior Families, 'Mech anatomy & Regimental organisations. There are two 22"x17" maps & 14 plastic miniatures: BattleMaster, Archer, Shadow Hawk, Griffin, Thunderbolt, Rifleman, Wolverine, Marauder, Wasp, Ph Hawk, Locust, Warhammer, Stinger & Crusader, direct castings of Ral Partha Mechs! **\$39.95**

Arms, armor, tactics, and a detailed history are all presented. 64 pages, plates by Angus McBride. \$24.95

\$17.50

□ VAN24 SOVIET HEAVY TANKS

COMPUTER GAMES

SSI THE GREAT WAR 1914-1918

Originally \$80.00

This game is one of the best two player games I have seen (and it makes a pretty good solitaire computer game too.) It features dozens of authentic WW1 combat units, including infantry, machine gunners, sappers, several types of artillery, aircraft, all manners of ships, etc. There are 30 scenarios, ten that can be played two player, ten that can be played solitaire as Germany, and ten that can be played as France/British. Each player takes turns giving orders to his units while the other plots the firing of any units in range. After combat, those units which survived can then move as ordered. It makes for an extremely entertaining game of chess, and luck has little to do with it. You must truly out think and out manoeuvre your opponent. **IBM requires: 286 or better, 640K RAM, VGA, hard disk, 3.5" FDD, and mouse recommended.** **IBM - \$30.00**

ORI SHADOWCASTER

Originally \$110.00

A fantasy adventure with heaps of great 3-D graphics, where you can pan around like in *Doom*. You play a character with the ability to change at will into one of six forms. For example, you enter a room full of water - no problem, change into a frogman. You can be a human, feline, floating eye, gremlin, frogman, flame lizard, and terramental. The adventure can be solved in one of several different ways, you don't have to search for THE perfect solution. There is no mapping, resting, eating or spell memorization. Great soundtrack and sound effects. **IBM requires: 386/DX33 or better, 4 meg RAM, hard disk, 3.5" FDD, VGA, mouse.** **IBM - \$30.00**

360 V FOR VICTORY Gold . Juno. Sword

Originally \$90.00

You must have SVGA to use this computer game. It is the latest in the V series, and takes you back to the Normandy beaches. As the allies you have to take and hold a beach head large enough to secure a foothold in Europe and open the second front against Germany. As the German player you have to throw them back into the sea. There are six scenarios, which include the 6th Airborne Division holding the Orne Bridge, the elite 12th SS Hitler Youth Division attacking the British 3rd London Infantry Division, the Commonwealth 1st and 30th Corps advancing to Caen after breaking out of the beachhead, a hypothetical German counter attack, the British 7th and 50th Divisions attempting to seize and hold Villers-Bocage, and the powerful German 9th and 10th SS Panzer Divisions launch a counterattack against the British 11th Armored Division, and the Campaign Game. Graphics are absolutely superb - you could not find a more pleasing to the eye computer wargame, and game mechanics can be picked up quickly, and the interface is easy to use. **Requires: IBM 386SX or better, 3 MB RAM, 512K Super VGA, Dos 5.0, hard disk, mouse, 1.44 MB 3.5" FDD.** **IBM - \$30.00**

You can play the game using the computer only, and can have up to 7 computer players, though the computer players do not ever make alliances, so are not much of a challenge. But should you only have 3 or 4 human players, the computer players make great cannon fodder. One of the greatest attractions of the game is that you can use it to resolve the turns when playing the board game. Just type in everyone's orders, end the turn, and it will instantly work out who goes where, and if you've rigged up a printer, it will even print out the results for you, listing centres gained and lost, and asking which pieces to lose when centres are lost. Graphics are extremely crisp CGA. Requires: either 5.25" or 3.5" FDD, and CGA or better graphics card. **\$50.00**

An excellent and playable game of the entire World War Two European Theatre, from the invasion of Poland in Sept'39 to June'45. The game is for one or two players, with the Allied player looking after the Western allies and Russia. There is an option for either the western Allies, or Russia, or Germany, to be put under computer control. Which I thought was great, as I wanted to play Russia only. There are six scenarios, or the entire campaign, which takes 60-80 hours. The graphics are stunningly clear VGA, with all units looking exactly like the pieces in a board wargame, rated for strength and movement. The strength points go down according to step losses, and the movement points reduce as you move the unit. The units are army or corps sized, and include infantry, tank, paratroopers, engineers, air, naval, and headquarters, etc. There are a random number of impulses each turn, tending to be longer during summer, shorter in winter. Levels of play include beginner, intermediate and advanced. Naval is broken into spheres of operation, much like in the boardgame War at Sea. Amphibious operations, strategic bombing, U-Boat warfare, are all included. Another pleasing aspect is Research, where there are ten types of technology that you can develop, including AA-Radar, ASW-Sonar, jet-fighters, AT-Guns, heavy tanks, etc. Politics are included, allowing you to flex a limited resource of political muscle to subvert nations into your camp. When producing units, a unit destroyed in combat can be rebuilt at half cost, and all units will appear from 2 to 5 turns after production begins, depending upon

unit type. This forces you to plan ahead. Requires: 386 or better, 1.44 meg 3.5" FDD, 2 meg RAM, hard disk, VGA. **IBM - \$90.00**

PACIFIC STRIKE

Featuring stunning graphics, you dogfight Japan's finest aces from Pearl Harbor to Hiroshima. You can rise in rank as you progress, and can even alter the course of the war. You visit nine Pacific sites, Pearl Harbor, Coral Sea, Midway, Guadalcanal, Solomon Islands, Marianas, Leyte Gulf, Iwo Jima, and Okinawa - you even have a chance to render the atomic bomb unnecessary. You fly 37 missions, including dogfights, bombing raids, strafing runs, and torpedo attacks. You fly the Wildcat, Corsair, Hellcat, Devastator, Dauntless and Helldiver. PACIFIC WAR

We've managed to obtain more stocks of this excellent game! By Gary Grisby, it covers the entire Pacific War from 1941 Pearl Harbor to August 1945, and includes all the nationalities involved, including Australia, India, USA, Japan, China, Indonesia, New Zealand, etc. There are superb graphics for all planes and ships, with different paint schemes for planes according to nationality and theatre. Every single ship that saw service in the theatre is included: CVs, CVLs, CVEs, BBs, CAs, CLs, DDs, DEs, troop transports, merchantment, oilers, patrol boats, etc. You command every single plane, land based and carrier, and all land units, from engineer battalions and up. Game mechanics are somewhat different from Second Front, so players can expect to be a little confused at first - but once you've got the hang of it, you will soon consider this the finest computer wargame around. The complete game will take around 40 - 80 hours, and you must plan every turn ahead, controlling supplies, airgroups, invasions, etc. The computer can control any of your own forces, or you can take complete control. There are 5 scenarios plus the campaign, with historical and random setup, kamikazes, atom bombs, etc. Note: always play by pressing the "X" key, as this will change the map flags into easy to follow symbols. For those interested, please send us one blank high density disk and \$3.00 postage, and we'll send you two unofficial SSI updates on this game, taken from a US bulletin board. **Requires: 286 or better, 1.44 mb 3.5" FDD, hard disk, EGA or VGA, 640K.**

ROMMEL: BATTLES FOR NORTH AFRICA

The Italian army has been routed out of Egypt: the Germans respond by dispatching a small, albeit elite force, to try and stem the Allied advance. For the next two years, outnumbered and poorly supplied, this Africa Corps outwitted and out fought all of its opponents. ROMMEL recreates the furious and sometimes chivalrous, battles for the desert with nine scenarios - from the entire Syrian campaign to a hypothetical invasion of Malta, plus all the necessary accessories for the construction of variant engagements. **IBM requires 3.5" FDD.**

WAR IN RUSSIA - By Gary Grisby

Gary Grisby has totally redone SECOND FRONT, using many of the excellent aspects of PACIFIC WAR. It is for 1 to 2 players, with 8 historical scenarios, 1 hypothetical scenario, and 4 campaigns. The complete campaign takes up to 70 hours. Units are German Corps and Russian Armies, but stacking limits have rectified the loop-hole of Second Front where you could place three Panzer Divisions and five infantry Divisions in one Corps. Tank & mechanised corps, Panzer and Pz Grenadier Divisions, have 3 stacking points, independent sub-units have 0 stacking points, and all other units, such as infantry divisions, have 1 stacking point. A German Panzer Corp, and a Soviet Tank or Shock Army, can take 9 stacking points. You can put more than 9 SPs if you desire, but the unit will lose readiness, eg, if there are 15 SPs, you will lose 75% of the unit's readiness. A Soviet infantry army takes 5 SPs, and an Axis infantry corps takes 3. If this unit has 8 infantry divisions, it will now have a SP of 8, and suffer 50% readiness loss. Another bug fixed is that you can no longer transfer divisions and sub-units from any unit to any other unit. Firstly, a corps or army must be 50% or more readiness or you cannot transfer anything in or out of it. Secondly, the maximum distance units can transfer is the worst supply level of the two units. eg, SL is 3, so max no. of hexes to be transferred is 3 hexes. Another major loop-hole of Second Front was that any unit could move any distance at all on the map. No longer! Now in march mode, infantry units can move up to 5 hexes, and mechanised up to 10. Combat plotting is still the same as before, with infantry moving a max of 2 hexes, and mechanised 5. But you will lose 10% readiness per hex, so armored units will no longer want to move 4 hexes and then make an attack. One of the greatest new features of the game are Operation Points, as found in Pacific War. Each HQ receives an allotment of OPs each turn, based on your resources. That HQ can then move units under its command according to the OPs it has. This can severely hamstring your defense if you lose HQs or have a lot of actions you wish to perform. Crucial units will end up not being moved simply because you had to spend the points on other units even more important. Other features include stunning graphics on all units, just like in Pacific War. When you call up a Panzer Division to examine it, and when there is a battle, you will see full color side views of each tank type, gun, armored car, and aircraft. The game even includes a scenario editor, allowing you to change pretty much any aspect of the game. **Requires: 386 or better, EGA or VGA, 3.5" 1.44 meg FDD, hard disk, & 640K RAM.**

SCIENCE FICTION**DOOM**

This game contains three episodes. The first is available free on shareware, but the other two are only available in this retail version of the game. DOOM is an absolutely sensational

IdSOFTWARE

three-dimensional, first person perspective adventure, from the creators of Wolfenstein 3D. The graphics and world details are absolutely without compare, and when you move, you can literally pan around - you are not limited to simply left, right, ahead, back. In fact, you can shuffle sideways and sprint. You even bob up and down as you walk and run. The game starts with yourself being a member of a ten man squad sent to Phobos, one of Mars' two moons. The scientific research station there has gone strangely quiet, it was experimenting with dimensional rifts. The moon Deimos has disappeared all together! You are left outside to secure the perimeter while your squad goes in - and when they are wiped out, you realise you're on your own. You then go into the complex on Phobos, where there are nine bases to explore, each containing up to 8 secret rooms or passageways, which open by a push, a trigger you pass over, or by shooting the right panel. You soon encounter hordes of demons of all shapes and sizes, as the dimensional rift was inadvertently opened into hell! Please note that I have only played the first episode in this game, on the ultra-violence option. As such, it is rather gory. But the 2nd and 3rd episodes are reputed to be so sickening that I have not even attempted to play them - the 3rd is like Indiana Jones & the Temple of Doom. But to the first episode I am addicted, there is simply nothing like it. You can find and use a pistol, shotgun, chaingun, rocket launcher, chainsaw, and can find health packages, armor upgrades, computer maps, invisibility suits, anti-radioactive suits, etc. The graphics include stunning outdoor views of Phobos' mountain ranges, and if you can find the secret doors, you can go outside too. Tactics such as covering fire, shooting from corners, etc all work, and you can even trick the demons into fighting each other! Man I hate those walking dump-truck demons! Another great plus is that you can play the game on a network, with 2 to 4 people working together or against each other. An addictive game, but be warned, episode 3 is really grotesque. **IBM requires: 3.5" FDD, hard disk, VGA, 386 or better, 4mb RAM. IBM - \$70.00**

REACH FOR THE STARS

SSG
This is one of the best computer games ever made, and certainly the delight of "number crunchers". It contains two games, Standard and Advanced, which are both very different. It can be played solitaire against 3 computer opponents, or with up to 4 human players, as each player builds up his home world, developing Navigational, Industrial, and Ship Technology, and building up the world's industrial, social and economic levels. This allows population to increase, and colonists can then be sent out to colonise newly discovered worlds. There are 53 star systems, each with up to three planets, which could be hostile or ready to colonise. But the other three players will be attempting the same, and only one can win - so players first build up an industrial base, and then use this to manufacture multiple battlefleets and storm troopers - ready to conquer the galaxy! The game is both an economic and military challenge. Have you ever played in a Play By Mail game in which you wished the turn around was five minutes and not two weeks? Well, that's what this game is like - PBM heaven. This game can be played PBM. Each player does his turn, ends his turn and enters the next players turn, saves, and posts it to the next player. Simply make all battles be to the death. **AMIGA - \$45 IBM - \$45**

SPACE HULK

ELA
Its back - and now available on CD-ROM, see below. The game is a simulator of the popular miniatures game of the same name. You lead one or two squads of Dark Angel Terminators in over 50 missions against limitless hordes of genestealers. You give commands to your squads using "Freeze Time", which comes in a limited supply. You can take control of any one terminator, and can jump from Terminator to Terminator by using the Function keys. Graphics are stunning, and you get to fight in three different types of hulks as well as under ground. Weapons can be chosen by you in some missions, and include storm bolters, lightning claws, heavy flamers, assault cannons, etc. Sound is great - even through your PC speaker the Terminators talk to you, warning of ambushes, which trooper is under attack when using two squads. Still one of favorite games. **AMIGA - \$50.00 IBM - \$50.00**

SPACE HULK on CD-ROM

SYNDICATE

ELA
A corporate syndicate take over of the world, set in a cyberpunk dark future, using a team of cyborg soldiers. You gain both technology and weapons throughout the game, which costs money. Money comes from taxing conquered areas. You are competing against 7 other syndicates. Your cyborgs are either recruited during missions, or picked up and given a full body conversions after being run over by a car (on purpose of course!) There are fifty or so missions, using superb partial down-view 3-D graphics. Each mission requires your cyborg team to achieve something that will further your attempt to rule the world. Missions include corporate extractions to steal important people from rival syndicates, assassinations of political and military targets, retrieval of required items, etc. Graphics used to attract various scenes together, such as the intro and mission de-briefings, are breathtaking. Please note that this is a very dark game. **Requires: 512K SVGA, 386SX or better, 4 meg RAM, mouse, hard disk, 3.5" 1.44 meg FDD. IBM - \$50.00 MAC - \$99.00 AMIGA - \$80.00**

WING COMMANDER

ORI
This game is without doubt one of the best computer game ever designed, both with unequalled graphics and playability. The game is a flight simulator set in the year 2654 AD, in which mankind is locked in a desperate war against the murderous Kilrathi aliens. The game links each flight together in a stunning campaign, and you will fly 20 missions out of a total of 40, and which 20 missions you will fly depends on how well you do. With each flight, you have the option of speaking with other pilots to learn tactics and hints, a briefing where you are told your mission, and then follows a stunning sequence as pilots scramble to their fighters, to be catapulted into

space (even better graphics than BATTLESTAR GALACTICA!) There are four different fighters to fly, each with their own four cockpit views, different weapon loads, shields, armor, and manoeuvrability. The game is very simple to learn, with a tutorial provided. You will be given missions to escort and protect friendly capital ships - from slow, ponderous tankers to 700 meter long carriers, to fighting deadly dog fights against five enemy fighter types (and watch those Jalithi, with 6 guns they are murderous!), and you will also be given missions to hunt down and destroy enemy destroyers, tankers, and carriers. The game is simple to learn, difficult to master, and has no boring moments, an autopilot removes any waiting during travelling. **IBM requires 1.44 MB 3.5" FDD, hard disk, VGA, 286 or better. WING COMMANDER #1 DELUXE

Has 4 new ship types, & a mission selector for WING COMMANDER: SM #2 is the second sequel to Wing Command, and the hardest yet. A newly joined ally of the Confederation is beset by hundreds of Kilrathi ships, and when one enemy carrier & it's fighters defects, you are sent on a deadly undercover mission to save them. You will fly an enemy fighter (with stunning graphics!), and battle 16 missions before you can save the new allies. **Requires 1.2 MB 5.25" or 1.44 MB 3.5" FDD, VGA & hard disk. IBM - \$80.00**

WING COMMANDER II

ORI
The best game has just got better! This is a sci-fi space ship simulator, with over thirty different missions to fly, each mission being linked together with character interaction and storyline, with graphics so stunning you will think you are at the movies! The year is 2664, ten years since the TIGERS CLAW was destroyed by Kilrathi stealth fighters, and you, the finest pilot of the Confederation, were framed by human traitors as being responsible for the disaster, before being court martialled and sent to a backwater outpost. But after ten years of boredom, the war suddenly approaches your sector, and you are thrown into combat once again. You get to fly five new fighters, including a jump-capable fighter-bomber. Larger fighters now have rear or flank turrets, which you can also control, and capital ships can now be taken out with one or two hits by new killer torpedoes. You will be stationed on a space station, planetside, and on a new space carrier, as you battle against murderous Kilrathi aliens - but watch your back, there are human traitors aboard the carrier, and they are picking off your fellow pilots one by one! New graphics for take-off and landing sequences will leave you stunned, as will improved graphics following character interaction as the thirty mission story continues. You will get to converse with pilots, officers, repair crews, renegade Kilrathi, and so on. The new Kilrathi fighters and ships are more deadly than ever, and your mettle will be put to the test. Any friendly wingmen can eject from destroyed fighters, and if you fly the two heaviest fighters, you can retrieve these pilots with your rear tractor beam. (The graphics of ejected wingmen spinning helplessly through space while sitting in their chairs is amazing.) The game takes up 11 to 15 meg on the hard disk. **Requires: hard disk, 1.2 MB 5.25" or 1.44 MB 3.5" FDD, 286 or better, and VGA. IBM - \$50.00**

WING COMMANDER PRIVATEER

ORI
The best Wing Commander yet. You play the part of a profit seeking privateer in the Gemini sector, smack into between the Kilrah Empire and infested nests of pirates and religious fanatics. You start the game with a rustbucket of a merchant scout, and can start earning a dollar by buying a selling goods according to supply and demand, collecting bounties on pirates or mercenaries heads, by delivery cargo for a merchants guild, or by clearing nav points of Kilrathi or pirates. You can even be a pirate, blowing up ships and stealing their cargo with your tractor beam, to resell later. What do you do with all this money? Well, first there are heaps of upgrades you simply must buy for your ship - stellar maps, ECM packages, repair droid, bigger guns, bigger engines, bigger shield generators, etc. And then there are three bigger ships you can buy, a powerful merc gunship, a huge merchant cargo ship, or a bounty hunter heavy fighter - which is more powerful than any other fighter in any other Wing Commander. There is a 20+ mission campaign involving discovering a new alien race and getting a super-weapon from them, but its rather hard. Apart from that, there are unlimited profit money missions you can fly, and there are 70 star systems you can explore to your heart's content. Graphics are better than ever, and you can land on planets, mining bases, recycling bases, pleasure worlds, a military space station, etc. **Requires 386 or better, 2 MB RAM, VGA, 1.44 MB 3.5" FDD, hard disk. Strange places: a mysterious Breton manor house, a galleon surging up out of the past, a bewitching tropical island, and strikingly true-to-life characters: Melkior the secret agent from the future, Delia the fortune teller... They all feature in a scenario that has been carefully plotted and brilliantly directed. But who is Doralice supposed to save? You'll find out by going back in time and working out the clues of an intriguing plot. **IBM Requires: VGA, 3.5" FDD, hard disk, Microsoft compatible mouse, 286 or better. SHADOWCASTER

ORI
There's been a lot of noise about this game, but I did not really know why until I sat down and looked at the box in more detail. You can morph at will - your human character has six metamorphs, feline, floating eye, gremlin, frogman, flame lizard, & terramental. Each form has its own weaknesses and powers. You can replay the adventure in a number of different ways, you don't have to solve it in just one way. Fly, swim, run indoors and out, through dungeons, caverns, castles, mines, volcanoes and underwater caves. The game basics can be mastered quickly. You can concentrate on combat and puzzles, no mapping, resting, eating or spell memorization, & very little text, just lots of action throughout. The realistic and outstanding 3-D graphics allow you to pan around, just like in Castle Wolfenstein 3-D. Has a stunning soundtrack & sound effects. **Requires 386DX33 or better, 4 mg RAM, 16 meg on the hard disk, VGA, 3.5" FDD. IBM - \$50.00**
◆ **SHADOWCASTER on CD-ROM IBM - \$99.00**

WARLORDS

1 to 8 players can participate in this large strategic fantasy campaign. Set in the medieval-fantasy world of Illuria, a fragile peace treaty has expired and after quickly dispensing with any pretence towards peaceful negotiations, all eight nations declare war on each other in a race to gain supreme power. Mechanics are simple, and include diplomatic ventures, economic restraints, production of military units and strongholds, and exploring for magical talismans or allies, such as dragons, ghosts, wizards, etc. There are 80 cities to conquer, 10 terrain types, 16 troop types and races, and terrain-racial combat modifiers. "Treat your defeated foes with the contempt they deserve - and off with their heads!" says the blurb on the box, which well sums up the friendly atmosphere. (We have been asked by customers to warn you - it is extremely addictive!) Note: the IBM version is an improved version. **IBM - \$50.00 AMIGA - \$50.00 MAC - \$50.00**

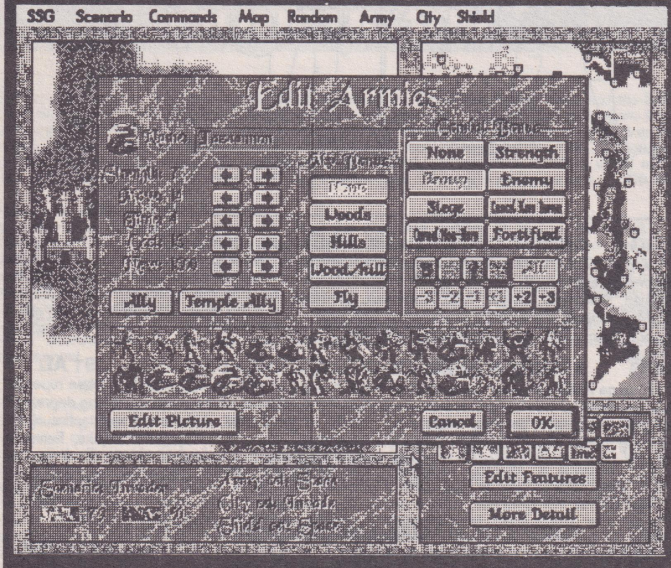

WARLORDS II

The long awaited sequel to Warlords is here - and it is greatly improved. It is for 1 - 8 players, any of which can be computer controlled. Computer intelligence is good, with levels being knight, lord, or warlord. An amusing option when playing against computer opponents is I am the greatest, which makes them all attack you all-out from the first turn. One of the greatest attractions of this new version is random maps - an unlimited number of them. You can even choose the percentages of woods, hills, water, etc. One brilliant quick-start option allocates all of the cities to the eight players, so you do not need to rush about exploring and gathering an industrial base - just produce armies and start kicking butt straight away! There are heaps of new unit types, such as giant spiders, scouts, wolf riders, pikemen, elephants, etc. Cities that can only produce one or two troop types, can invest gold in buying the ability to produce other troop types of your choice. Heroes can still romp around the map looking for talismans and allies (and unwittingly trip over monsters who are trying to stop them).

Another great attraction of this game is that it contains diplomacy - even against the computer players. You can be in one of three diplomatic states with all of your opponents: allied, where you should not attack his units or cities; neutral, you can attack his units but should not attack his cities; and hostile, where you can attack freely cities or armies. In the diplomatic action screen you can change the way you wish to deal with another player, and it is in your advantage to declare war on someone first and attack him second. If you backstab him, all the computer players will lower their ratings of you & if you are rated the lowest, they will all declare war on you. **Requires: IBM 386SX or better, 3.5" 1.44 meg FDD, hard disk, VGA, 2 meg RAM. IBM - \$75.00**

WARLORDS II SCENARIO BUILDER

With this superb add-on for Warlords II, you can do anything at all that you wish to the game. You can edit any of the existing scenarios (and this game comes with 24 new scenarios, including Ancient Rome, Napoleonic Britain, a sci-fi world, etc), you can edit the pictures of any troop types using a simple point and click interface, you can edit any map, again with point and click, you can edit the strengths and speed etc of each troop type, control what can be built at cities, etc. The editor also allows you to build a world from scratch, and you can place your own land masses, put cities where you want them, and any type of unit at all - with a little imagination you could even make a space game based on Star Fleet Battles Federation & Empire! **Requires: IBM 386 or better, VGA, hard disk, 3.5" FDD, 2 MB RAM, mouse. IBM - \$63.00**

STRONGHOLD Kingdom Simulator

This is an extremely mesmerising game. You start the game with yourself as baron and with 4 party characters. Each of the 5 characters starts to build a manor, which can grow almost infinitely in size and quality. The baron first builds a castle, and the party members build keeps. Your 5 characters can also be selected from the races/classes of elf, dwarf, fighter, thief, cleric, or halfling. Elves cultivate trees the best, producing more income and produce than any other character class. Dwarves are best at mining rock resources, fighters are the best in combat. Halflings are the best. They excel at farming, and are almost as good as the elves in tending trees and the dwarves in mining. Basically, each of your five characters will produce, or recruit, off-spring, and these will spread out from the original castle and keeps. Once they are in a plot of land that has no constructions, providing you have money in the bank, you can start to build something in that plot, whether farms, houses, guild halls, money vaults, etc. Over two dozen basic building types can be built, and each class has its own building types as well. Most buildings or farms, woods, etc, can be upgraded several times, so that in the end what began as a wood ends up a profitable orchard. Graphics are stunning, with a 3-D view of the whole world, regardless of where you stand. Once your empire gets rather big, you can see farms and houses stretching away until they are too small to distinguish. The game is also a combat simulator, where you can both defend your home empires from attack from hordes of AD&D monsters and villains, or you can go hunting down enemy strongholds. **Requires: 386 or better, VGA, 2 meg RAM, 3.5" 1.44 meg FDD, hard disk, mouse. IBM - \$90.00**

UNLIMITED ADVENTURES

You've probably noticed that there are not many AD&D titles left - but not to worry! This game is in fact an AD&D game builder, or construction set! You can build maps with an easy to use grid screen and link them with teleporters, doorways, and stairwells. Choose characters from 112 monsters and NPCs. Design dungeons of your dreams. There is a complete scenario included, which can even be edited. You can use 200 classic art images included, digitised pictures from AD&D, import original art files, combat uses the strategic overhead phased system, and there is easy backup. **Requires: 286 or better, VGA, hard disk, 1.44 MB 3.5" FDD. IBM - \$90.00**

SMCITY 2000
At last it's here - the completely revamped version of Simcity, with 3-D views available at three magnification levels and graphics so stunning you can't put the game down. Specially designed for VGA, can be played as a beginner or with options turned on as an expert. You can create and then run your own cities, or run any of the cities provided. If you do a good job of running your city, people will flock to it, otherwise they'll leave - so practise is required to learn their likes & dislikes. Cities can also reach up to the 5,000,000 mark, as opposed to the limit of 500,000 of Simcity Classic. You can build residential, industrial, & commercial zones, including things such as highways, tunnels, on-ramps, bus depots, parks, zoos, marinas, police stations, airports, harbors, police stations to control crime, educational facilities, arcologies, churches, and alternative power sources such as gas, solar, micro-wave, etc. It features 64 levels of altitude, an underground level for water, subways, variable sized zones, more city services, terrain editor, local newspaper for events, angled roads, new disasters, etc. The game is run by a simple point and click on the toolbar and pull down menus. There are heaps of pull down graphs that show the trends of population, budget, etc. If you enjoyed Simcity, you'll love Simcity 2000. **Requires: IBM 386 or better, 4 meg RAM, hard disk, VGA, 3.5" 1.44 meg FDD. IBM - \$99.00**

FAULTY PROGRAMS

If you have received a faulty disk for any reason - do not send it back to us! If you do, it will sit in our damaged section until someone has time to send it off to be repaired. Instead, give us a call or a letter, and we will give you the details of the Australian company which distributes the game. This company will give you a Return Authorisation number so that you can return the disks to them, they will fix the disks, and then send them straight back to you. This way you cut us out from being the middle man, and will get your repaired disks much sooner than otherwise.

WRG DE BELLIS MULTITUDINIS Mass Ancient & Medieval Combat

These are the best set of ancient and medieval miniatures wargames rules around. They are simple (just 36 pages), with the most elegant combat system I've seen. You can play with either 25mm, 15mm, 6mm or 2mm figures. All figures are based in elements. eg, all 15mm troops are placed on a base 40mm wide. This has 4 close order infantry, or 3 cavalry or loose order infantry, or 2 light horse or open order infantry, or one elephant or chariot. There are nineteen troop classifications (eg, spears, knights, light horse), each having up to five grades (such as Superior or Fast), and all are either regular or irregular. The combat system is pure magic - only two pages long. And the most important things are the flanks on each one of your elements - each needs to have another element on either side. All units have a combat factor against foot and horse. When two elements fight, each player adds 1D6 to his combat factor, and there are a few combat variations to be added or subtracted. If inferior troops score lower than their enemy, they receive a further - 1 (ie, fight goes against them & they lose heart), whereas if superior troops score lower, they get + 1, ie, fight goes against them but they're tough so they just lump it. Normally, if one element scores up to double it's opponent, the opponent retreats its base width. But there are lots of exceptions. If knights (which includes troops such as cataphracts & Macedonian Companions) recoil spears, pikes, warband, psiloi, etc, they are destroyed. If psiloi recoil elephants or suicidal chariots, they are destroyed. If one element scores double or more than its opponent, the opponent is normally destroyed - but again there are many exceptions. Foot elements that score double that of light horse, can do no more than make them flee for one turn. Also, spears, pikes & blades (which includes Legionaries etc) can only ever be recoiled by light horse. Psiloi can only be destroyed by mounted troops, bowmen, or psiloi or auxilia. Otherwise they flee.

There is also a magnificent command system. Each general (usually have 2 to 3, each with his own command) throws 1D6, and this is the number of actions that general can perform. Generally, an element or group (elements in base to base contact) will cost one pip to move if regular, or two if irregular. Light troops are always 1 pip. They really are excellent rules. **\$16.00**

WRG DBM ARMY LISTS Book # 1 3000 BC - 500 BC

A 54 page book of army lists written especially for DBM. The average size of armies used with DBM is between 300 - 500 points. I recommend 200 points for 25mm, which is around 30 elements or around 90 figures; or 375 points for 15mm, which is around 60 elements or 180 figures. This book includes notes on each army, rules for using allies, climate, aggression, and terrain types for each army, etc. Armies included are: Egyptian, Syrian, Assyrian, Babylonian, Mycenaean, Trojan War, Early Hoplite Greek, Thracian, Early Macedonian, Roman & Etruscan, Early Achaemenid Persian, Early Carthaginian, etc. **\$16.00**

WRG DBM ARMY LISTS # 2 500 BC - 476 AD

A 76 page book of army lists, including some of the Ancient period's greats. Later Hoplite Greek, Alexandrian Macedonian, the Successors, Camillan, Marian, Early, Middle, Late, & Patrician Roman, Hunnic, Alans, Gallic, Hsiung-nu, Armenian, Ancient British, Sassanid Persian, Early German, Visigoth, Vandal, Pictish, Saxon, and my favorite - the Parthians. The first seven games I played of DBM were of Parthians fighting Marian Romans, and I immediately fell in love with the Parthians. The cataphracts are rated as being Knights(X), ie, exceptional. This means that they are classed as superior against spears, pikes, horse, & bowmen, but inferior against blades, knights, or warband, ordinary in all other cases. And moving 150 paces, they are basically fast super heavy infantry, and against legionaries in two ranks, they make for an even battle. But the horse archers! Zipping all over the place and totally invulnerable against any enemy foot. **\$16.00**

WRG DBM ARMY LISTS # 3 476 AD - 1071 AD

Army lists to cover the Dark Ages and Early Medieval period. Covers Byzantine, Ottoman Turks, Vikings, Normans, Saxons, Charlemagne, King Arthur, Slav, Bulgar, Khazar, Spanish, Tribal Mongol, Vietnamese, Early Polish, Papal Italian, Early Russian, etc. **\$16.00**

The High Medieval Period, and one of the most popular periods in history. It includes Anglo-Norman Britain, the Crusades, Mongols, 100 Years War, War of the Roses, armies of the Italian city-states, Poland, the Hussites, etc. Due in August at the latest! **\$16.00**

WRG DE BELLIS ANTIQUITATIS Fast Play Ancients Rules

Wargames Research Group's fast play ancient & historical miniatures rules. Game mechanics are a simplified version of DBM, using the same basic concepts. One major difference is that all armies consist of 12 elements or bases of figures, which means that no army can have over 50 figures. There are no point values. It is a 20 page book containing simple yet effective mechanics that cover troop definitions, terrain, camps, close combat, missile fire, artillery, etc. Includes a suggested six nation campaign, historical army lists, all of which require only a small number of figures. Very suitable for 25mm, 15mm, or 1/300th scale games. **\$7.50**

WRG HORDES OF THE THINGS

A 40 page book of fast play fantasy miniatures rules, using a system very similar to DBA. All armies consist of 24 points, and can include the troop types aerial hero, god, dragon, paladin, behemoth, magicians, heroes, airboats, artillery, sneakers, clerics, flyers, knights, riders, beasts, blades, spears, shooters, warbands, hordes, and lurkers. Large battles can be played, simply by adding further generals, each of which commands 24 points. The average 24 point army will include 24 - 36 figures. Combat is very similar to DBA and DBM, and so the game is extremely fast moving and easy to learn. Hordes are done in a novel way. If one is eliminated, the next turn you can replace it by spending one command pip, and it arrives in your stronghold or back board edge. **\$16.00**

WRG ARMIES OF MACEDONIAN & PUNIC WARS 359 - 146 BC

A superb 192 page sourcebook on the period of ancient history from the time of Phillip of Macedon, Alexander the Great, to the arising of Rome as the dominant power. This book is one of the most comprehensive history books available, detailing each nation in great detail, including: the Persians, Greeks including: Boiotia, Sparta, Athens, Phokis, etc; Macedonian, including Phillip's reforms and Alexander; the Successors, Bactrian & Indian Greeks, Thracians, Illyrians, Steppes, India, Carthage, Spaniards, Celts, Rome, Etruscans. History and tactics of each of those powers is included. For example, did you know why the Greek Hoplites right flank tended to beat the opposing left flank? Each of the major battles of the period are covered. And best of all, there are over 100 pages of troop dress and equipment, including an illustration of every troop type, diagrams of common shield patterns and designs, & colors of tunics & armor, horses, etc. **\$38.00**

WARHAMMER 40,000

SCI-FI

GAM WARHAMMER 40,000 BOXED SET

At long last, the new rules for Warhammer 40K have been released. Instead of a single rule book, the new Warhammer 40K comes as value packed boxed set along the lines of Warhammer Fantasy. The game includes: 40 Gretchins, 20 Space Ork Goths, 20 Space Marines (2 squads), including 14 bolters, 2 sergeants, 2 missile launchers, & 2 flammers. There is a rulebook, Wargear equipment book, Codex Imperialis background book, ruined buildings, burst templates, counters, cards for Wargear, missions, vehicles, dreadnoughts, etc.

And best of all, the rules have been greatly updated. Intelligence, will power & control have been replaced by Leadership. So only one roll is required for for all psychological & break tests. Movement has been changed: reserve move has been replaced by the run move. The Space Marines have been seriously upgraded in performance. Their toughness has been raised, they can use double bolter fire if they did not move, they can ignore their first break test failure, & they have an improved saving throw for their armor. There are now a limited number of moves in which to achieve your objective. Vehicles have been streamlined, with the targeting template removed. Special equipment is treated like magic in Warhammer Fantasy, with each having its own card.

This game includes a free 40K Codex book of temporary army lists, to be used until the new army list books come out. **\$90.00**

GAM DARK MILLENIUM

At last - the boxed supplement that every 40K player needs to complete the game. Has 60 Psychic cards, 24 Vehicle Datalax cards, 8 Psychic Power templates, 10 Vehicle cards which provide extra equipment such as super charged engines and add-on missiles, 55 Wargear cards to add to those in the 40K boxed set, 18 Strategy cards, 4 new mission cards (2 new missions), a deck of 36 Warp cards, assorted counters, and of course, the rulebook! And the new psychic rules are heaps better than those in the 40K boxed set. If anything, they now have less impact. Players draw a number of psychic cards in proportion to how many psychers are in the game. eg, if there are 3 psychers, you throw 3D6, and get that many cards evenly distributed between you. These cards include power cards and nullify cards, as well as some special ones. You use these to activate your psychic powers. **\$60.00**

GAM 'EAVY METAL WARHAMMER 40,000 PAINTING GUIDE

The definitive volume to painting Warhammer 40,000 miniatures. It is broken down into easy to follow sections on the main races and troop types in the 40K universe. It includes everything from preparing your models, through detailed color schemes and how to apply them, to painting special character models. This is the painting guide you need. 96 pages, including color banners. **\$30.00**

THE FINISHED MODEL

The finished conversion was left to dry and carefully painted in the same colours as the Captain in the picture. Getting the colour scheme right is just as important as the modelling work. The details in the paint scheme give the miniature most of its individual look: the skull on the knee-pad and the flame design on the armour are particularly important. The colours used are standard for Blood Angels, only certain details vary.

MINIATURES' PAINTING SERVICE

We are pleased to offer all of our customers a miniatures painting service, using primarily Southern Cross Miniatures, an out-of-house professional miniatures-painting business. **We expect a four week turn around on orders.** You may either:
a) request us to have figures you are buying from us to be painted before we deliver them to you, or
b) you can send to us any figures you currently own that you wish to be painted.

The rates and terms are as below:

Painting Technique A: The highly detailed Citadel Connoisseur quality paint job. Includes shading, assembly & basing of miniatures. Please tell us what base sizes the miniatures should be on, & any required colors, etc! Monsters & machines require a lot of assembly work, hence their high price.

Painting Technique B: High quality paint job which includes shading, assembly & basing of miniatures. Please tell us what base sizes the miniatures should be on, & any required colors, etc! Monsters & machines require a lot of assembly work, hence their high price.

Painting Technique C: The wargames standard paint job for those rank & file figures, which includes assembly & basing of miniatures. Please tell us what base sizes the miniatures should be on, & any required colors, etc!
